

DR. SONIA LEZIY

DDS, Dipl Perio, FCDS(BC), FRCD(C)

Dr. Leziy lectures internationally on a broad range of topics including implants, managing/preventing disease around implants, digital workflows and advanced esthetics/periodontal plastic surgery.

She has been recognized among the top 100 clinicians in continuing education by Dentistry Today in 2007 to present. She was the Lucy Hobbs Award winner (mentorship category) in 2012, the 2013 co-recipient of the Seattle Study Club Saul Schluger Award along with her partner Dr. Brahm Miller, recipient of the 2022 Distinguished Lecturer Award from the American Academy of Esthetic Dentistry, and recipient of the 2022 Distinguished Lecturer Award from the Greater NY Academy of Prosthodontics.

She maintains a full time private practice in Nanaimo, British Columbia.

DR. MATHIEU NAULT

DDS, MSc, Dip, Perio, DABP, FRCD(C)

Dr. Nault practiced as a general dentist in Quebec before completing his post-graduate studies in Periodontics at the University of British Columbia in 2016.

He received numerous awards in the field of dentistry, including the

“Nobel Biocare Achievement Award in Osseointegration” for his clinical excellence.

Dr. Nault was a clinical instructor at McGill University in 2012-2013. His research interest focused on the role of blood platelets in periodontal diseases.

He practices in Nanaimo and West Vancouver, BC

ADVANCED DERMAL GRAFT PROCEDURES FOR ROOT COVERAGE

SYNOPSIS

Recession defects are common among patients that are cared for by dentists and periodontists. There are several indications for treatment, and there are numerous methods used to address tissue quality and stability issues.

This one-day course is designed for the clinician who wants to learn more about dermal graft procedures for root coverage. Course participants will develop basic skills to treat simple to moderately complex cases.

This course will include a lecture review of the procedure technique, indications, limitations, side-effects or potential complications and use of appropriate surgical instruments.

The unique benefits of using Straumann's acellular dermal matrix graft will be discussed and illustrated.

The use of 4 tunnelling instruments developed by Dr. Leziy and marketed by ProNorth Medical will be illustrated. These instruments are included in the course participation fee, to ensure that all participants will be equipped for treatment of future cases in their practices on completion of the course.

THIS COURSE IS CO-SUPPORTED BY

SURGICAL KITS ***INCLUDED**

Surgical kits / instrumentation have been designed for this procedure. They will be available for use at the course.

COURSE OBJECTIVES

PART 1 LECTURE WITH DR. LEZIY/DR. NAULT
2 Hour didactic/lecture on current grafting concepts. Understand the gold standard autogenous graft indications and where allografts can be used. This lecture will cover terminology, the varying contemporary surgical protocols that are used for tissue augmentation, indications, and treatment outcomes/expectations. A brief video review of a typical case will be presented.

PART 2 Observation of a live surgery demonstrating the Dermal ARC grafting protocol for root coverage. Dr. Leziy and Dr. Nault will each treat a patient and narrate the steps of the entire procedure. Participants will have the opportunity to move between each of the surgeries to see varying approaches unique to the clinical situation of the patient.

PART 3 All participants will have the opportunity to perform surgery on one of their own patients under the supervision of Dr. Leziy & Dr. Nault.

- Clinicians who are not licensed in BC may observe other participants. Cases should be pre-selected by the participant.
- We strongly encourage you to forward in electronic format, photographs of the cases that you intend to treat, to make this the best learning experience possible. Ideally, large regions requiring treatment should be considered (4+ teeth) in otherwise periodontally healthy patients. It is ideal to select patients who are not extremely anxious and that do not require sedation for treatment.

WHAT IS INCLUDED

- 1-day education program, coffee/lunch.
- Dermal ARC tunneling instrument kit.
- Dermal matrix graft material - provided by Straumann.
- Sutures - provided by ProNorth Medical (Rob Horne)

EXPECTATIONS

REQUIRED SURGICAL KITS

Surgical tunneling instruments have been designed for this procedure AND are **included** in the course fee.

Understand the etiology of recession and the indications for grafting. Learn to classify recession to predict treatment outcomes and to prepare your patients appropriately before they are treated.

Review current microsurgical grafting techniques and applications. Pros/cons of various grafting approaches will be discussed.

DERMAL GRAFT TECHNIQUE & IN-DEPTH PROCEDURAL REVIEW

Review of surgical instrumentation, flap designs, suturing techniques. Recipient site preparation options. The rationale for using acellular dermal grafts. Understand the healing phase and treatment outcomes. Post-surgical management of your patient. Identifying treatment risks and managing surgical and post-surgical complications.

WHAT IS NOT INCLUDED

- A patient for the hands-on supervised treatment.
- Your own CDA
- Your own basic surgical kit (a basic list of minimum instrumentation will be provided to all participants upon registration).
- All required disposables: Gloves, masks, patient drapes/protective eyewear, anaesthetic, 15C scalpel blades, analgesics to be administered prior to surgery, preop oral rinse.
- Your own protective eyewear/magnification, uniform/gown.
- Prescription pad or prepared scripts for ant
